## ► G L A S S ◄

An innovative and protective glass treatment that is factory-applied to all the glass surfaces to help repel dust and water making your windows easier to clean.

*Protection has never been so clear.*

- Easier to Clean
- Optically Clearer
- More Impact Resistant
- Lifetime Glass Breakage Warranty

# EEE-Z-Kleen™

## ► G L A S S ◄

EEE-Z-Kleen is an advanced technology that provides simple maintenance and time savings along with improved glass clarity, visibility and strength. EEE-Z-Kleen enhances the appearance and prolongs the life of the insulated glass in your new Vista windows.

Drop of water on EEE-Z-Kleen™ treated glass surface.

### Maintenance

EEE-Z-Kleen's specialized coating process transforms the glass at the molecular level creating a highly hydrophobic surface. Glass becomes very smooth and impervious to moisture, thereby blocking corrosion and preventing permanent spots.

### Visibility

The EEE-Z-Kleen process makes the glass optically clearer and brighter by perfecting the glass surfaces in your windows.

### Strength

The chemical transformation that takes place after EEE-Z-Kleen is applied to the glass surfaces of your windows, reduces the friction on the surface of the glass so dramatically that they are actually considerably less likely to break. An object that hits the glass surface on an angle will be more likely to glance off and not break the glass after application of EEE-Z-Kleen.

**hy•dro•pho•bic** (hī,drə-fō'bīk), *adjective*  
1. tending to repel or fail to mix with water.

## A Closer Look

Untreated glass, like the kind you get in regular windows, is very rough and porous. Contaminates such as oil, hard water deposits, finger prints and even dust will cling to the surface. Water spotting can occur and end up becoming a permanent part of the glass.

Washing your windows using standard household cleaners that are commonly ammonia-based can actually accelerate this condition. EEE-Z-Kleen glass virtually eliminates all of these problems.

*Untreated surface of glass as seen under a microscope.*

Made of a seven-part polymer, the EEE-Z-Kleen coating fills in the microscopic peaks and valleys of the glass surface. This chemical bond makes our glass more brilliant, more impact-resistant and much easier to clean.

Our unique process reduces the probability that dirt and other deposits can stick to your glass. The result is a glass surface guaranteed to stay more hydrophobic for ten years.

### Cleaning Tips:

*Do you still need to clean your glass? Absolutely.  
Below are some tips to make the most  
of your EEE-Z-Kleen glass.*

- ▶ For crystal clear results, we recommend using micro-fiber cloths. These can be purchased at any home center.
- ▶ Use a mixture of 1 part rubbing alcohol to 4 parts water. Wipe down the window using the mixture and a micro-fiber cloth, then buff with a dry micro-fiber cloth.
- ▶ NEVER use ammonia or acid-based cleaners or abrasive materials like cleanser on your windows. They will shorten the life of the "hydrophobic" qualities of your window as well as void your warranty.

## LIFETIME LIMITED WARRANTY Glass Breakage Warranty

The exclusive EEE-Z-Kleen protective glass treatment that has been applied to all of the glass surfaces of your Vista windows is guaranteed to provide "hydrophobic" dust and water repellant qualities for as long as you own and live in the home in which the windows were installed. Vista Window Company is so confident in the EEE-Z-Kleen enhancement process, we are willing to stand behind glass breakage for the same period of time.

This warranty is only valid after the completion of the installation of the windows into your home. Installation must be totally finished by your Vista Dealer in accordance with Vista Window Company's installation specifications.

In the unlikely event glass breakage does occur, Vista will provide the replacement glass unit free of charge to the original installing dealer.

This warranty does not cover acts of God, hurricane, earthquakes, tornadoes or any other major accident, crime or vandalism which would destroy numerous portions of the home or the entire home. In these or any instances that you would file a claim against your homeowners insurance policy you would be covered up to the full deductible of your insurance policy, with a maximum of \$500.00. In any event of this type of damage whether filed with your insurance company or not the maximum liability to Vista Window Company will be \$500.00.

Any windows that exceed published size limitations are excluded. Any window which is removed from the home is excluded. Beveled and grooved glass is excluded, and garden windows are excluded from coverage. This warranty is only valid for single family dwellings, in which the home owner resides. Rental property and commercial property is excluded.

Using AMMONIA- or ACID-based cleaners or abrasive materials like cleanser on your windows will shorten the life of the "HYDROPHOBIC" qualities and void your warranty. This is similar to using sandpaper on a Teflon coating; it is certainly not recommended. Using these types of cleaners will create a film on the glass surface.
